WELCOME TO OUR COMPANY

At the forefront of fire safety, and occupational health excellence, **Safety Lines Engineering** Consulting stands as a trusted consultancy partner in the United Arab Emirates. As an Abu Dhabi Civil Defence Approved organization, supported by highly qualified NFPA-certified engineers and ISO-compliant professionals, we are committed to delivering advanced, reliable, and performance-driven safety solutions that protect lives, assets, infrastructure, and business continuity.

We integrate deep technical expertise with global best practices to provide comprehensive consultancy services aligned with UAE Fire & Life Safety Codes, NFPA standards, and internationally recognized occupational safety frameworks. Our approach is tailored to meet the evolving risk, compliance, and engineering demands of modern industrial and built environments.

Driven by innovation, precision, and professional integrity, we focus on delivering practical and fully compliant safety solutions that strengthen operational resilience and contribute to safer workplaces and communities across the UAE.

ABOUT US

Safety Lines Engineering Consulting is a leading UAE-based multidisciplinary consultancy firm specializing in fire safety engineering, occupational health and safety advisory, building evacuation engineering, and comprehensive regulatory compliance services.

As a UAE national-owned organization officially approved by Abu Dhabi Civil Defence, we are committed to delivering globally benchmarked consultancy solutions that adhere to the highest international safety standards and operational excellence requirements. Our team comprises highly experienced engineers, safety consultants, inspectors, and technical experts with in-depth proficiency in fire protection systems, life safety engineering, evacuation strategy development, and occupational safety management.

We deliver tailored consultancy solutions across diverse sectors, including commercial developments, industrial facilities, healthcare institutions, educational campuses, logistics warehouses, residential communities, hospitality projects, airports, retail complexes, and data centers. Through the integration of advanced engineering methodologies, internationally recognized standards, and practical field expertise, we enable organizations to mitigate operational risks, ensure regulatory compliance, enhance safety performance, and safeguard human life and valuable assets.

OUR VISION

Setting new benchmarks in fire, safety, and engineering consultancy across the United Arab Emirates through innovative, internationally aligned solutions that elevate safety performance, operational resilience, and regulatory excellence.

OUR MISSION

Delivering reliable, efficient, and internationally compliant consultancy services in fire engineering, occupational health and safety, building safety, and emergency management through advanced technical expertise, strategic innovation, and an unwavering commitment to protecting lives, assets, and business continuity.

OUR CORE VALUES

OBJECTIVES

- **Excellence in Building Safety** - Delivering superior consultancy services that ensure structural integrity, regulatory compliance, and operational reliability across diverse facilities.
- **Advanced Fire Protection Solutions** - Providing innovative engineering strategies that effectively reduce fire risks, enhance emergency preparedness, and safeguard lives and property.
- **Enhanced Workplace Safety** - Promoting proactive occupational health and safety systems that minimize hazards and strengthen organizational performance.
- **Professional Integrity** - Upholding transparency, ethical conduct, and accountability in all professional engagements.
- **Technical Excellence** - Ensuring precision-driven engineering solutions supported by advanced knowledge and industry best practices.
- **Innovation & Continuous Improvement** - Embracing modern technologies and evolving methodologies to enhance safety outcomes.
- **Commitment to Safety** - Maintaining an unwavering dedication to protecting lives, assets, and communities.
- **Client-Centered Solutions** - Delivering tailored consultancy services aligned with client needs, regulatory requirements, and operational goals.

OUR CORE SERVICES

Fire Engineering & Performance-Based Design Consultancy

- Performance-Based Fire Engineering Design Solutions
- Fire & Smoke Modelling (CFD Simulation)
- Human Evacuation Modelling & Analysis
- Fire Safety Strategy Development
- Compliance Assessment & International Code Review
- Fire Risk Assessment & Mitigation Planning
- Structural Fire Safety Evaluation
- Fire Protection System Consultancy
- Digital Compliance Mapping & Verification
- NFPA & UAE Fire Code Consultancy

Fire & Life Safety Inspection and Auditing Services

- Fire & Life Safety Audits
- Under-Construction Building Inspections
- Existing Facility Compliance Assessments
- Civil Defence Compliance Verification
- Fire Protection System Evaluation
- Testing & Commissioning Witnessing
- Emergency System Functional Assessments
- Risk Categorization & Deficiency Reporting
- Corrective Action Recommendations
- Authority Approval Support Services

Occupational Safety & Health (OSH) Consultancy

- OSH Management System Development
- Safety Policies & Procedural Frameworks
- Safe Work Instructions and Operational Guidelines
- Workplace Hazard Identification and Risk Assessment
- Mechanical, Electrical & Chemical Risk Evaluation
- Safety Signage Design and Site Safety Mapping
- Incident Investigation and Root Cause Analysis Support
- Medical & Occupational Health Compliance Procedures
- Safety Documentation and Records Management Systems
- HSE Audits, Inspections, and Compliance Monitoring
- Regulatory Reporting and Performance Tracking
- Safety Equipment Planning and Procurement Support

Evacuation Engineering & Emergency Planning

- Emergency Evacuation Plan Development
- Building Escape Route Design and Optimization
- Evacuation Procedures and Emergency Protocols
- Assembly Point Planning and Management
- Evacuation Signage and Safety Diagram Design
- Crowd Flow and Occupancy Analysis
- Emergency Preparedness Consultancy
- Evacuation Simulation and Modelling
- Regulatory Compliance Review and Validation
- Fire Drill Planning, Design, and Coordination

Fire & Life Safety (FLS) Training Services

- Fire Warden Training
- Emergency Response Training
- Practical Firefighting Training
- Fire Extinguisher Handling and Usage Training
- Hose Reel Operation Training
- Workplace Hazard Awareness Workshops
- Fire Safety Compliance Training
- Emergency Evacuation Drill Training
- Occupational Safety Awareness Programs

Specialized Consultancy & Support Services

Safety Lines also provides:

- Firefighting & Emergency Operations Consultancy
- House of Expertise Engineering Consultancy
- Emergency Equipment Maintenance Coordination
- Fire Protection System Advisory Services
- Safety Management Consultancy
- Engineering Safety Evaluations
- Regulatory Authority Coordination
- Technical Compliance Documentation
- Safety Project Monitoring & Reporting

GET IN TOUCH

WHY CHOOSE SAFETY LINES?

- Abu Dhabi Civil Defence Approved Company
- UAE National-Owned Organization
- Highly Qualified NFPA-Certified Engineers
- ISO Standards Compliance
- Experienced Multi-Disciplinary Safety Team
- International Code & Regulatory Expertise
- Customized Safety Solutions
- Strong Commitment to Quality & Compliance
- Advanced Engineering & Risk Assessment Capabilities
- Reliable Client Support & Professional Service Delivery

INDUSTRIES WE SERVE

- Commercial & Corporate Buildings
- Residential Developments, Industrial Facilities
- Warehouses & Logistics Centers
- Educational Institutions, Healthcare Facilities
- Hospitality & Hotels, Shopping Malls & Retail Centers
- Airports & Transportation Facilities
- Data Centers & Critical Infrastructure
